ONE-TAP PARENTAL CONTROLS

DO YOU KNOW WHERE YOUR CHILDREN ARE (ONLINE)?

The Internet is often no place for kids. Take the good that is available with kids' apps, education sites, games, and let Island leave the dangerous stuff behind. Island's one-tap parental controls feature answers the question, *what's it worth*?
What's it worth to know:

- Your 4-year-old will never accidentally end up on a porn site
- Your high schooler won't stay up all night gaming the night before the SATs
- You have a history of where your child has traveled on the Internet and what sites were attempted/blocked

There is so much riding on the network, but most important are its youngest users.

SET BY DEVICE, USER, OR GROUP

Block and allow access at the group level all the way down to the device level. Allow or pause access on one or all of Johnny's devices, or put Johnny in a group with the other kids in the home.

URL LOGGING/NOTIFICATIONS

Island shows parents not only where kids are going on the Internet and on which device, but also the exact URL(s) of any sites blocked due to filters. Want to receive a notification of attempted access? You can set an alert for that.

EASY, SOPHISTICATED SCHEDULING

Want to schedule dinnertime? Pause access from 6-7PM Monday-Friday with Island's intuitve scheduler. Or, set bedtime at 9:00PM on weekdays and 11:00PM on weekends.

EXTEND TIME WITH A TAP OR SWIPE

You know it's coming -- "I just need 15 more minutes or I'll lose my game!" With Island, extending time is easy. A tap and you're done.

WEBROOT DATABASE

Island uses the award-winning Webroot URL database. Right out of the box, Island protects against malware, phishing, BOT-NETs, and more. Set restrictions on over 80 different categories or use the convenient, pre-configured umbrella feature. And, because of Island's premium hardware, the entire database resides locally, off the cloud, with updates every hour.

NO SUBSCRIPTION FEES

Not only are there no subscription fees—ever—there are also no performance hits, and no way for kids to circumvent the settings (such as using anonymizers or VPNs). Parents are in control.

ISLAND®

GENERAL SPECIFICATIONS

PERFORMANCE

- 3.7 Gbps throughput
- 2,000,000 packets/sec
- 130,000 connections/sec

HARDWARE

- CPU: quad-core 64-bit Intel® processor @ 1.8GHz
- 4 GB of dual-channel, ECC 72-bit RAM
- 64 GB of Flash storage
- Copy-on-write, ultra-high-integrity file system
- Four 10/100/1000 Gigabit Ethernet ports
- Internal full-range (90-270VAC) power supply
- Dimensions/weight: 5.965" d, 2.362" h,
- 420 grams/14.8 ounces
- Certifications: FCC Class B, U/L, CE.
- Sustainable, recyclable plastic enclosure
- 2-year product warranty

GENERAL

- Everything Island does is per device
- Supports up to 5,000 connected devices
- Collects and stores device activity for 1-3 years
- Exceptional VPN performance
- Both IPv4 and IPv6 enabled by default
- Supports up to 3 separate LANs
- Port forwarding by device name rather than IP address
- Uses DNS over HTTPS by default; also supports recursive DNS and DNSSEC
- DDNS
- DHCP reservations
- UPnP
- Supports multiple Internet connections, for redundancy or load-balancing
- Includes Wireguard VPN built-in with Island-proprietary extensions

TARGET ENVIRONMENTS

- Residential, work-from-home
- Education environments (schools, libraries)
- Conferences, competitions where kids are present
- Small-to-medium businesses
- Property managers, Airbnb + VRBO hosts
- Hospitality venues (restaurants, hotels)
